The FT's phenomenal growth from a small, poorly financed academic society to one of the world's leading powerhouses of thought must be put in the context of the country's long-established model, through which successive governments in the economy and society have been forced to operate under the direction of the state. The FT is a catalyst in the transition to a market economy, encouraging the government and society to function more efficiently.

The FT's role is to be seen in the context of the country's broader economic and social transformation. The FT has played a significant role in the country's economic and social development, helping to create a more open and competitive market economy. It has also helped to promote greater public awareness of the importance of economic and social transformation.
